TECHNICAL SKILLS

Backend & Cloud: Java, Spring Boot, Microservices, Kafka, gRPC, REST APIs

Databases: Couchbase, SQL, NoSQL

Architecture: Event-Driven Systems, Cloud Native BSS, Distributed Systems

Tools: Grafana, Prometheus, Git, CI/CD

Languages: Java, Python, C++

Web: Angular, JavaScript, HTML, CSS, Bootstrap

WORK EXPERIENCE

Senior Software Engineer | Rakuten India

Jun 2024 – Present

- Primary backend owner for Bill Invoice, Bill Document Generation, and DMS microservices serving a 10M+ subscriber telecom platform.
- Designed event-driven billing flows using Spring Boot, Kafka, gRPC/REST, and Couchbase across invoice and collection pipelines.
- Authored end-to-end LLD and service design for Rate Composer service for call, SMS, and data usage rating delivered from design to production.
- Improved Kafka producer throughput using buffered batch publishing instead of single-message sends to reduce topic overhead.
- Built scheduler and batch frameworks for charge extraction, migration billing, and remediation workflows.
- Resolved production billing error spikes within ~2 hours using deep debugging and targeted correction scripts.
- Created production-safe billing data remediation scripts preventing customer impact and SLA breaches.
- Review PRs and mentor junior engineers on design, performance, and code quality practices.
- Collaborate with QA, product, and billing operations teams for complex invoice and rating releases.

Software Engineer | Rakuten Symphony

Apr 2022 – May 2024

- Core backend engineer in Cloud Native BSS billing platform delivering invoice and billing microservices.
- Led invoice structure and billing workflow enhancements for B2B telecom systems.
- Implemented distributed services using Spring Boot, Kafka, gRPC, and REST.
- Reduced invoice job execution time by ~30% by decoupling heavy PDF generation workloads and isolating compute-heavy stages.
- Delivered billing pipeline optimizations reducing bulk processing bottlenecks.

Associate Software Engineer | Rakuten India

Jun 2021 – Apr 2022

- Developed backend services for CRM and ISP BFF telecom platforms.
- Built invoice creation and billing calculation components, implemented storage integrations with S3 storage.
- Created Grafana dashboards using Prometheus queries adopted across teams.
- Delivered Spring Boot microservices and REST integrations.

Technical Intern | Rakuten India

Mar 2021 – Jun 2021

- Built Spring Boot and Kafka-based backend services and REST integrations.
- Worked on microservice features and API integrations.

EDUCATION

- B.Tech - Anil Neerukonda Institute of Technology and Sciences (2021) - **GPA: 8.8**
